

 MedSov

A middle-aged man with short, graying hair, wearing a white lab coat over a blue and white checkered shirt, is looking intently at a large black computer monitor. He is standing in a modern, brightly lit clinical or pharmacy environment. In the background, there are white shelves stocked with various boxes of medicine. To the right, a window with a white frame shows a small potted plant on the sill. The overall atmosphere is professional and focused.

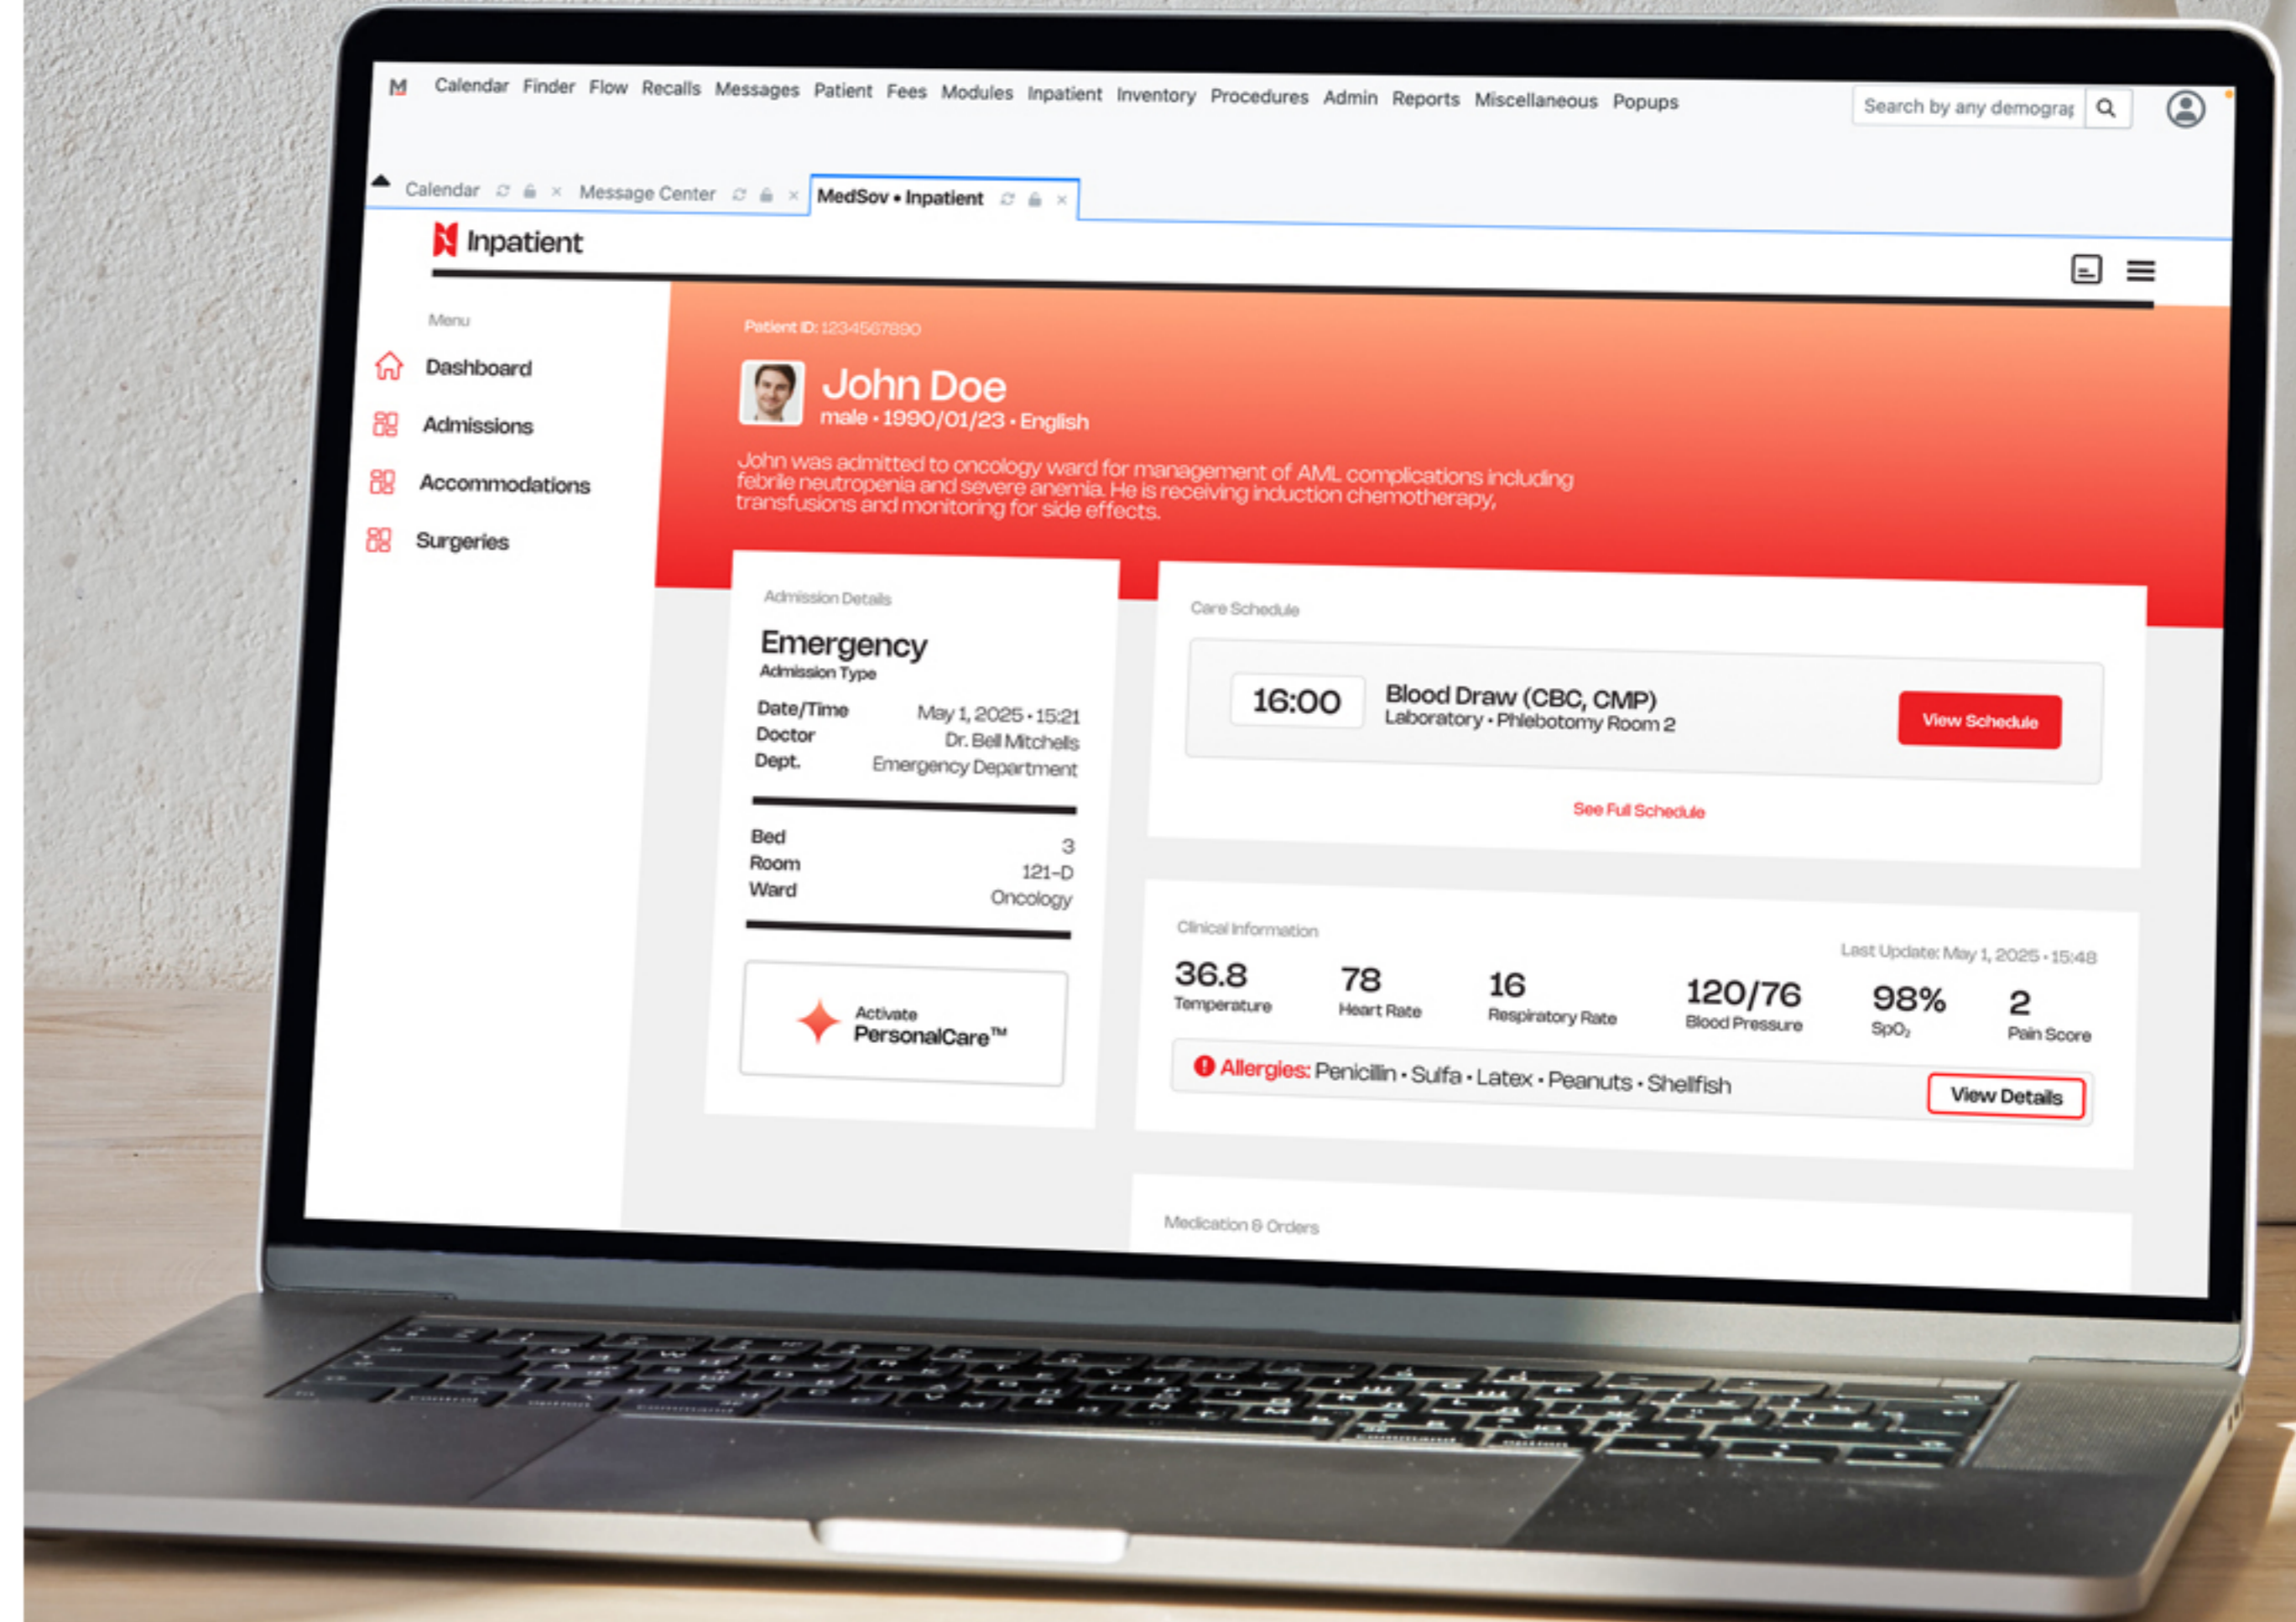

A powerful modular ecosystem - one unified global health record

MedSov, powered by OpenEMR, redefines the healthcare delivery experience through a modern modular meta platform for global healthcare.

Built for a data driven, interconnected world, it delivers robust interoperability through HL7 and FHIR compliant records and leverages AI to assist with medical notes and insights, giving providers more time to deliver richer, compassionate care.

Every module works together from admissions to advanced care coordination, streamlining workflows, improving outcomes, and ensuring every patient's story is captured in one unified record.

### **Electronic Medical Record**

Secure storage and management of patient data with role-based access.

### **Comprehensive Patient Data**

SOAP notes, allergy history, vitals, and lab results all in one place.

### **Billing & Claims Processing**

Flexible billing and claims workflows designed to support diverse payer and reimbursement models.

### **Compliance & Security**

Full audit logs, reliable backup tools, and regulatory compliance features.

## Online Appointment Scheduling

Empowering patients to book appointments effortlessly, reducing administrative burdens.

## Comprehensive Medical History

Detailed recording of medical histories for informed continuous care.

## Flux Health Exchange

Purpose-built for MedSov, Flux securely propagates patient data across connected installations.

## Telehealth Consultation

Secure virtual visits that expand access to care, improve follow-ups, and reduce no-show rates.

## Robust Integrations

Integrations with labs, pharmacies, e-billing services to streamline practice workflows.

## Patient Portal

Secure access for patients to view appointments, billing information, documents, and communications.

## Access Control & Security

Granular, role-based permissions ensure the right people access the right data.

## Analytics & Reporting

Robust dashboards providing insights into health trends and operational efficiency.

# Modules designed to optimize workflows.

Designed to reduce friction across clinical, administrative, and operational workflows—while remaining flexible enough to adapt to regional, regulatory, and practice-specific needs, across diverse care environments and system requirements.

## OUR MODULES

- **Waystar (e-Billing)**
- **PathGroup (e-Labs)**
- **Stripe Connect**
- **Speech-To-Text**
- **Patient Intake**
- **Inpatient**
- **Telehealth**
- **Print Management Suite**
- **History & Physical (H&P) Form**
- **Patient Appointment Scheduler**

We help you select the right modules based on clinical relevance and regional availability.

## St. Lucia MOH adopts MedSov EHR.

In partnership with Jipa Network, Gov. of St. Lucia adopts MedSov to improve health delivery services for it's citizens.

## Health IT for 200K+ providers in South Africa.

Aligned with Allianz Holdings in joint bid to deliver MedSov as a HMIS solution to South Africa's SITA.

## MedSov donates to ophtho & ENT hospital in Haiti.

Empowering over 200 medical professionals and facilitating 55,000+ consultations annually.
